

Registering for classes with Lectures, Labs, Recitations, or other “CONCURRENT Requisites”

Some courses require that you also be registered in another course or courses along with it. This is called “Concurrent” registration.

Courses such as those in the sciences that have different Course Code numbers for their lectures, labs, and recitations are examples of “concurrent requisites”.

To prevent a registration error when you attempt to register for these courses, make sure that you enter all of the required concurrent course code numbers together **before you click the ADD COURSES button.**

For example, enter:

PHYS 206	C	(this is a physics lecture)
PHYS 206L	EF	(this is a physics lab)
PHYS 206R	RX	(this is a physics recitation)

.....AND **THEN** CLICK THE ADD COURSES BUTTON

Making Changes to Concurrent Courses

If you registered for any classes that have concurrent requisites and you wish to change one of them (for example you want to change just your lab time) please note that in order to do so you will need to drop all the concurrent requisites and re-add them (you’ll need to drop both the lecture and lab, and then re-add the lecture along with the newly desired lab time).

Dealing with Closed Concurrent Requisites

Do not exit registration until you are properly registered for all required “concurrent requisites”. If your lecture is open and your first choice lab is closed, register for your backup lab so that you meet all the “concurrent” requirements. If you exit registration after registering only for a lecture without a lab, or vice versa, you will be contacted and given 24 hours to correct your registration.
