BARCELONA IN BLOOM

### LIBRARY NOTES: RECREATIONAL READING

For those who have not yet found it, we now have a section of books we're calling "Recreational Reading." Our recent student surveys showed that students want more books to read for fun, and we're happily discovering that's the case for staff and faculty as well! Look for the display just past the elevator on the main floor of the library, near the overlook. New titles arrive monthly, so come check it out!

### DID YOU KNOW?

Purchasing and Accounts Payable has gone "green"! Well, we are working on it. We went live on Nolij (a document management system) on Sept. 3. We will gradually move to scanning in the mail each day, filing the paper until the audit for that fiscal year is complete, and including all of the paper in the campus-wide shredding. By moving to document management we will save paper and toner, increase our efficiency and more.

Of course, we have stacks and stacks of paper right now that still need to be scanned and moved into Nolij, but we will accomplish going green!
