Focus on Faculty 2011
This book celebrates the scholarship, service and excellence of our faculty at Bellarmine University.

As president, I realize that while classroom instruction and personal attention to students are the primary commitments of our faculty, they also devote considerable time and energy to pursuits beyond the classroom walls. Whether that involves conducting research, presenting the results of that research at scholarly conferences, publishing in journals and books, leading study-abroad courses or service-learning trips or creating artistic expressions, the significant accomplishments of our faculty bring recognition to Bellarmine University and are worthy of celebration.

Bellarmine University’s Strategic Plan identifies the following goals in pursuit of Vision 2020:

• Celebrate our Catholic identity in the inclusive Merton spirit as the foundation of our commitment to student fulfillment, global consciousness and environmental sustainability;
• Establish and sustain a climate of excellence throughout the university;
• Integrate an international focus and sensibility into all curricular and co-curricular programs;
• Enhance our reputation, expand our market and dramatically grow our enrollment; and
• Develop our financial, physical, and human resources to achieve our vision for the new Bellarmine University.

This book is organized around these goals, which are integral and central to our work at the university.

The achievements listed here represent research and service completed in the 2011 calendar year and underscore our commitment to being the premier Catholic university in the South, and thereby the leading private institution in the Commonwealth and region. Please join me in congratulating and thanking our faculty for their tremendous successes described in this book.
