### Please provide any comments regarding your impression of graduates from the Annsley Frazier Thornton School of Education

#### Comments

bellarmine graduates are passionate and compassionate with learners and colleagues

I am always impressed with the professionalism and the preparedness of our Bellarmine grads. I would prefer to hire a Bellarmine grad over other graduates. I love that they get a variety of experience in different school settings and also have the ece/ elementary ed certification.

They are all passionate about kids.

We have 8 teachers in our building currently who did their undergraduate work at Bellarmine. I have been extremely impressed with the quality of work and professional attitude that they bring to our building. Because of the great experience with Bellarmine graduates, we have worked with Bellarmine to build a partnership with the school, and we are actively recruiting Bellarmine graduates to come and teach at our school. Keep up the great work with preparing teachers to educate the students of Jefferson County!

# Please provide any comments regarding recommended improvements and/or changes for the educator preparation program at the Annsley Frazier Thornton School of Education

#### Comments

At the Elementary Level, teaching programs that align with the Science of teaching reading such as LETRS and the KCM Numeracy Counts

I think that the continued growth in our ESL population with continue be a needed focus for prep programs.

Teachers out of college are not prepared at all for the real world of teaching. They don't understand how to effectively plan and assess. They don't know how to analyze data to plan for next steps. They also struggle with classroom management strategies which is typically related to lack of engagement strategies. They also don't understand how students learn to read and therefore struggle to teach students in this area.

One way to continue to improve future teachers to be prepared would be to have each student in the teacher preparation program to complete IMSE/Orton Gillingham or LETRS Training. This would provide students with the "Why" behind the science of reading, and it would teach them the necessary pedagogical practices to help students learn to read. Along with this, the students would get resources that they could take with them as they move into their first teaching job that would help give them guidance and support on how to teach reading regardless of the level of support that they may receive at the school they go to.

I would also recommend the educator preparation program to utilize the Math in Practice text during a class involving differentiated instruction. This would be a great tool to help young teachers see the vertical progression of standards, ways to support students through the concrete, semi–concrete, and abstract understandings of concepts, and it would give the students a resource that they could utilize when they get their first teaching job that they can use from day one.

### Please provide any general suggestions, concerns or issues in the space provided below.

#### Comments

Regardless of the curricula that JCPS adopts, the foundations programs such as the Science of reading LETRS and KCM Numeracy counts will strengthen the instructional strategies and provide deeper insights for diagnostic and progress monitoring tools to supplement any curriculum in the content areas of literacy and math.

Behavior Management and scaffolding for ML students is a critical component of instruction at the Elementary Level as well, specifically for students with Autism. There are fewer students being placed in self–contained settings and homeroom teachers are not equipped to manage the behaviors and learning needs of a high volume of ML and ECE students. Preparing them with basic strategies and skills to start will reduce frustration and burn out.

Na

Teach students about the science behind how kids learn to read. Have them use standards to plan for lessons. Have them create assessments, analyze them, and plan for next steps. Teach them engagement strategies

Based on my experiences, Bellarmine graduates have been more prepared than other prospective teachers that we have interviewed/hired. We have been extremeley impressed and happy with the Bellarmine graduates that we have had the privilege of working with.
