

## Pecha Kucha Presentation Technique

From [TechnologyLearning](#)

*Humboldt State University, College of eLearning – May 2014*

Pecha Kucha (PK) is a great strategy to use for micro-lecturing. This technique is a concise, visual presentation that can be used in a variety of settings, including the classroom (online or face-to-face!). I have used this technique in many settings and have encouraged it for student-generated content for the simple fact that it forces the presenter to be very concise and deliberate with the limited time they have to present.

Pecha Kucha includes a total of twenty slides, twenty seconds each, for a total of six minutes and forty seconds. Take a look at this [Pecha Kucha presentation](#), sharing what it is all about in the PK format.
