

Brainstem I

Medical Neuroscience
Dr. Wiegand

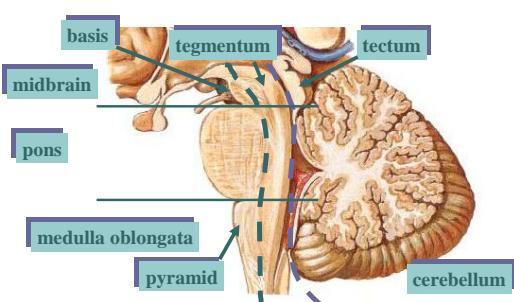

Brainstem Lectures

- Brainstem I
 - External structure
 - Cerebellum
 - Cranial nerves
- Brainstem II
 - Internal structure
 - Cranial nerve nuclei
 - Reticular formation
 - Location of selected tracts

Brainstem Organization

• • • | Ventral Brainstem

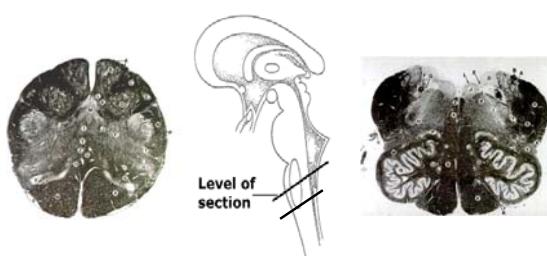

- Cerebral peduncles
- Interpeduncular fossa
- Basilar pons
- Pyramids & decussation
- Olives
- Anterior median fissure
- Olivary sulci
- Bulbopontine sulcus
- Cerebellar angle

• • • | Dorsal Brainstem

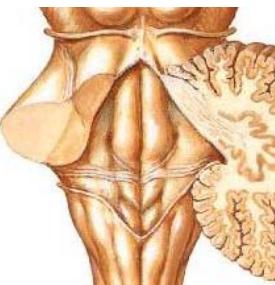

- Colliculi & brachia
- Cerebellar peduncles
- Rhomboid fossa
- Tuberculum Gracilis
- Tuberculum Cuneatus
- Tuberculum Cinerereum

• • • | “Open” vs. “Closed” Medulla

• • • | Dorsal Brainstem – Rhomboid Fossa

- Isthmus
- Velum
- Obex
- Posterior median sulcus
- Medial eminence
- Facial colliculus
- Sulcus limitans
- Stria Medullares
- Trigones
 - Hypoglossal
 - Vagal

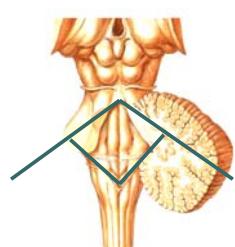

• • • | Cerebellum

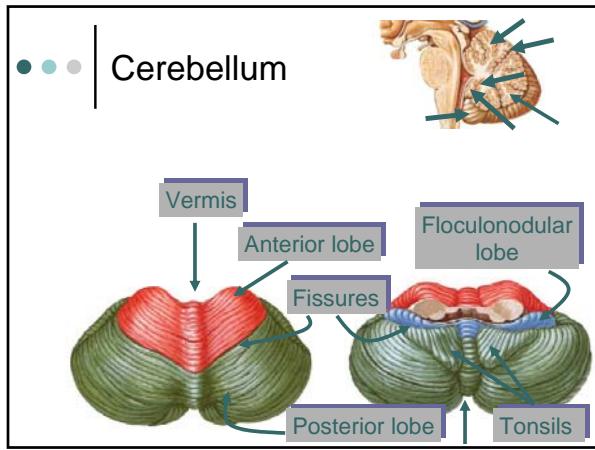

- Outgrowth of pons
- Connects to brainstem through cerebellar peduncles
- Functions
 - Muscle tone regulation
 - Coordinated movement
 - Postural control
 - Motor learning

• • • | Cerebellum

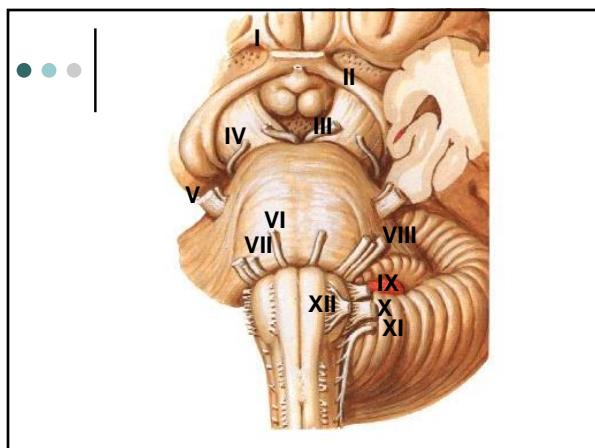

- Cerebellar cortex surrounding white matter
- Series of fissures and folia

• • • | Cranial Nerve Functional Classifications

- GSE – motor innervation of somatic musculature
- SVE – motor innervation of branchiomeric musculature
- GVE – motor innervation of viscera
- GVA – sensory input from viscera
- SVA – taste and smell sensory input
- GSA – general somatosensory input
- SSA – special senses of vision and hearing/balance

I, II

Cranial Nerves –
Telencephalon &
Diencephalon

- Olfactory –
 - smell (SVA)
- Optic –
 - vision (SSA)

III, IV

Cranial Nerves –
Mesencephalon

- Oculomotor –
 - extraocular eye muscles (GSE)
 - PSNS to eye (GVE)
- Trochlear –
 - extraocular muscle (sup. oblique) (GSE)

V, VI

Cranial Nerves –
Metencephalon

- Trigeminal –
 - Muscles of mastication (SVE)
 - General sensation of the head and face (GSA)
- Abducens –
 - extraocular muscle (lat. rectus) (GSE)

VII, VIII

Cranial Nerves – Metencephalon

- Facial –
 - Facial expression muscles (SVE)
 - Glands (submandibular, sublingual & lacrimal) (GVE)
 - Taste (SVA)
 - General sensation of ear (GSA)
- Vestibulocochlear –
 - Hearing and balance (SSA)

IX

Cranial Nerves – Myelencephalon

- Glossopharyngeal
 - Stylopharyngeus muscle (SVE)
 - PSNS to parotid gland (GVE)
 - Taste (SVA)
 - Carotid body sensation (GVA)
 - General sensation from ear & tongue (GSA)

X

Cranial Nerves – Myelencephalon

- Vagus
 - Muscles of larynx & pharynx (SVE)
 - PSNS to thorax and upper abdomen (GVE)
 - Sensory from viscera (GVA)
 - General sensation from ear (GSA)
 - Taste (SSA)

XI, XII

Cranial Nerves – Myelencephalon

- Accessory –
 - innervates trapezius and sternocleidomastoid (SVE or GSE)
- Hypoglossal –
 - tongue muscles (GSE)

● ● ●

Cranial Nerve Groups

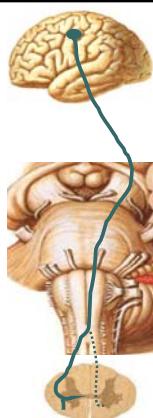

- Parasympathetic
 - III, VII, IX, X
- Motor
 - III, IV, VI, XI, XII
- Sensory
 - I, II, VIII
- Mixed
 - V, VII, IX, X

● ● ●

Descending Pathway

- Pyramidal or Corticospinal

Ascending Pathways

- Dorsal Column/Medial Lemniscal Pathway
- Anterolateral System
- Spinocerebellar Tracts
